Protection/Security/ Defense Individual Identity/Self-Definition Socialization/Individual Survival.	Strong Family/Individuals Individual Role Structure Individual Genetic Survival Dominance Over Nature

There is no need for a slogan, this is not a program; lets us build independent institutions, for our people, family, and communities. Socially transitioning from ignorance to knowledge knowing that knowledge applied becomes intelligence. The first thing that must be removed is ignorance of self some of us have been slightly injured and some have been severely injured ignorance is the oppressor and we must stop allowing ignorance to oppress us. This creation has given us all that is needed to deal with and handle any situation that we may find ourselves in. Everything that was raised or brought about into the world of all creation is done so with a purpose, a cause to communicate with clarity the energy of productivity materialized united in this energy coming together in the oneness of consciousness. (Unity)

We must raise our children to protect us from ignorance but yet they have been to do and act ignorant.

We must raise our children to help us from being ignorant to the ways of a tyrant that oppresses through a variety of ways where the duty is to liberate our people from a variety of ways of oppression. Thank you, Imam Jamil Al-Amin,

A protector is a person or thing that protects someone or something. A custodian to the people who depend on their assistants. A deputy or helpmate whose selfless behavior benefits the community. We need a system that promotes growth in everything; a system of united energies. Note: Societies are under a social reconstruction, where feelings are becoming financially and extremely desensitized, thoughts demoralized, attitude dehumanized, communication/language devitalized, and activity destabilized. The illiterate ignorance of hostility and social impoverishment. How is it to be overcome in feelings, thought, attitude, language/speech, activity, and actions as it pertains to the adverse effect? It is said every thought begins with a seed that must be planted in soil watered, nurtured, and cultivated. The land is the basis of power and that land must be tilled for production.
