20% from 40=20% of the undertaking in achieving your business goals

20% from 20= 0% of the undertaking in achieving your business goals

This business module means you must leave nothing to chance that will prevent you from achieving your business goals.

Objectives are considered at lower level that's where you begin to describe the specific tangibles products that delivers and make good and services that is being provided.

The function and the operation of objectives and goals is a combination of art and a science one awakens your business imagination while the, discovers it and the mathematical equation is the result of it once the description of the project of the undertaking aligns its adequately properly the task effort time energy and nature of project of business goals, The project undertaking and the project business goals and the project objectives.

- A) Project business description
- B) Project business objectives
- C) Project business goals

Goals one of the goals of a project may be to increase the overall student class participation by appealing to the student interest such as a sporting event then merge the sporting event into assignment of the point system has a math project. The must be a component that developed to be innovative and creative for student participation for higher learning. We at Common Humanity Mission, Inc. have 5 innovative and creative components understanding, tolerance, temperance confidence and respect.

There is always a need for new procedures new training reorganization and modification that is rewarded by the company for best of results.

A remainder it may take many project undertaking longer than others in achieving the goal. The goal should reference the business benefit of the business module in terms of task, effort, time, energy and nature cost speed , quality, Focusing of the quality of the goods and services that is being provided. If there is no business benefit value to the project, the project should not be started (how do you get others to see the benefit is the challenged in starting proceeding with any project or business venture)

Performance is enormously important for client satisfaction if you can measure the achievement of your goal, it probably more of an objective. If your goal is not achievable through the means medium and motive that it may higher than what is required you may have a combination of too many projects working at the same time the closer the limbs are to the tree the stronger is the further the weaker it becomes. Any goal that you are trying to achieve in life this perfect experience it may be a vision showing direction and may be aspiring which may never actually be achieved.

Goals are very important in life and as a business perspective the project manager need to understand become tolerant less temperamental more confident be more respectful to the undertaking of the project business description project business objectives and project business goals to assure that contributions are made.

Objections are concrete solutions or statements describing what the project is trying to achieve or accomplish. So that it can be evaluation at the conclusion of a project to see whether it is achievable or not do your best in goals setting not to be vague. **Objectives should be well rounded off specific meaningful measurable manageable, achievable reliable and time bound.**

Objectives are much more concrete in its solutions more specific than the goal solution and goal statement.

The objective is specific meaningful measurable and manageable achievable reliable and time bound in terms of average by the business module chart.

Objective is achievable and realistically time bound and should be completed at the date in time it was set.
