

RESPONSIBILITY AND ACCOUNTABILITY

Responsibility and accountability to be accountable to something or to somebody, it is said that every cause begins with a seed. The cause is to be proficiently effective.

Cause: what makes something happens or exists that is to be responsible for your existence and the existence of others and this is transmitted into a hereditary environment. Now we come to understand the grounds of a believe system the idea is agrarian in thought. The vapors that's the air along with the clouds could possibly precipitation becomes rain that drops from the sky to the earth into producing a crop principle producing principle this results into our material reality, that is to be principled driven. The key words as pronounced is that the prince becomes your pal your friend that you pay tribute than when come to what is known as tributary that is designed to protect each friendship with honor integrity dignity and respect. Example of tributary is a stream that empties into an ocean the smaller paying tribute or making contribution to the lager, Tributary relationships with and without interference because the treaty or a pact has been made not to interfere in each other affairs contributing to a healthy whole lasting relationship.

Dedication

Determination

Devotion

Commitment

These 4 attributes of tributary relationships becomes a commencement to the function and operation that it's to be celebrated. There are 4 stages of development of life:

- 1) The planting of life (soil water environment)
- 2) The growth or maturing of life (natural development)
- 3) The harvesting of life (ripe gathering)
- 4) The storage of life (capacity)

Foot note: in 1871 the constitution for the United States for America was changed to the constitution of the United States of America can this possible be a source of many problems? Congress realized the country was in dire financial straits, so they cut a deal with the international bankers (in those days the Rothschild of London were dipping their fingers and hands into everyone else's pie, i.e. pockets) thereby incurring a debt bankers liken onto the money exchangers in the temple or churches which a multi-million or billion industry I know its lucrative more power to them some do still have a heart.

However, what about the bankers or banks we know they don't just give money out of the goodness of their hearts. A bank will not do anything for you unless it is entirely in their best interest to do so. We have adopted that same mentality, even when murder is committed it seems to be done in the best of interest so it seems so they say so they think, There has to be some sort of collateral or some string attached which puts you the borrower into a subservient position. The convincing done by the international bankers were not about to land a floundering nation any money without serious stipulations. So they devised a brilliant way of getting their foot in the door seeing the united states as a prize they had coveted for some time, but was had been unable grasp the bankers were kept in check until they act of 1871 was passed.

In essence this act formed the corporation known as the United States note the capitalization, because it is important. This corporation, owned by foreign interest, moved right in and shoved the original version of the constitution into a dusty corner. For the coroner to determine the cause of death, with the act of 1871 of the constitution was defaced in the literal sense that the tittle was blocked to capitalized to change the word for carry a different message meaning and weight changed to of in the tittle. The original constituted that was drafted was written in this manner "the constitution for the United States. What constitutes what you and I value most that is to act responsibly to the value of our existence on this plain for this reason we become beneficiaries of the values that we all as humans must ultimately give account for one to another pass it on responsibility and accountability is designed for us to lead us to get to the root causal of the problem or problems. The disapprobation of resources, economics etc. this is the meaning of the prodigal son, he came to his senses. We must be prudent marked by wisdom or judiciousness concern for the future in our feeling thoughts attitude language and action and we know that the children are our future.
