

SOCIAL DEPRIVATION

WHO WE ARE AND WHAT WE DO WE ARE A TRANSITIONAL LIFE SKILLS DEVELOPMENT AGENCY THAT IS DESIGN TO FACILITATE MATURE SOCIAL DISCOURSE DOING SO WE WILL BE PROMOTING THE MATURATION PROCESS THE FIVE COMPONENTS ARE UNDERSTANDING, TOLERANCE, TEMPERANCE, CONFIDENCE AND RESPECT. OUR MISSION IS TO RECONNECT THE DISCONNECTED HUMANITY THAT IN EACH OF US. OUR TARGETED AUDIENCES ARE THOSE COMING OUT OF THE PENAL SYSTEM AND THOSE WHO SUFFER FROM SOME FORM OF ABANDONMENT AND STUDENTS OF MATRICULATION AS WELL AS THE HOMELESSNESS. HOW WE ACCOMPLISH THE MISSION IS THROUGH OUR MATURATION SOCIAL DEVELOPMENT CURRICULUM, THAT WE LEARN TO REASON FROM THE PREMISE OF CONVERSATION.

What we, are attacking is social deprivation: which is a dangerous social disorder that is detrimental to the inner growth and outward development of one's human capacity of understanding, tolerance, temperance, confidence and respect. This will result into a community that is in crisis. This community has become disconnected desensitized dehumanized and demoralized which inhabits our ability to appeal with the integrity of, other's human dignity in a socially civilized manner.

This incapacitated state is debilitating which precedes physical incarceration. Note if you will that the manifestation of order is the result understanding. Therefore it is a good thing when the efforts of your results become realized. This understanding is something we must give account for as our order duty and responsibility. When our codes of ethics are out of order, we need encourage corrective solutions to help aid and assist us in learning from our cultural experiences. Due to the fact as John Jackson stated out of civilization comes culture and civilization with in itself is a social construct.

This effort is designed to establish social coherency. When the energy of our efforts is not synergize for a useful purpose our community becomes fractured, leaving the social construct in crisis. If our time is not economized and established for a useful purpose as it was designed for the task; our efforts will be out of sync and in conflict with its original purpose of intent. As a result our syncretized nature will display an inability to rationalize and reconcile our differences. This extreme indifference becomes irreconcilable and unfriendly behavior; that's why we say to our clients that they must come with a conciliatory mind set in order for us to help aid and assist them through life transitions.

Now about the term penal in our approach with our clients there a transitional phase of what precipitates being introduced to the penal system is the separation of a sustaining substance called social solidarity. Many have pursued to change their condition, situation and circumstances as well as activity out of haste as a result you become your own worst enemy. This is the urge that we also help them to overcome.

When the struggle for change that is on the inside of us has been abandoned and neglected prior to incarceration than unlimited supply of understanding becomes profitable for the investors in the prison industry. So to be misunderstood misrepresented and misguided is a crime with in itself. In addition if the image in the mind has not changed as well many will continue to suffer from the behavior of juvenile and parental delinquency.

KEYS TO OUR SUCCESS

We will be creative and innovative that serves to undergird the maturation process. The basis of this must be understood in this wise there are 4 consolidating periods of life. First key is designed to address the need meeting period that based on incentives and motive of intent, why because we want our clients to be properly motivated. They will value the backdrop of reacquainting themselves with themselves.

Second key is designed to address the issue resolving period and that is based on indicatives and determination why because we want our clients to expand their world view of themselves and about themselves. They will view the backdrop of expansion.

Third key is designed to address the problem solving period that is based on influences and environment why because we want our clients to be principally driven unto removing hindrances that prevents them from progressing through the power of reasoning. The back drop is the vices and agency of influences.

The fourth key is designed to address the question and answer period that is based on indicators and directives why because we want our clients to remain encouraged.

OUR SYSTEM PROGRAM OPERATIONAL RESPONSES:

- 1) How well our clients respond to detailed methods procedures and modalities.
- 2) How well our clients respond to social interaction of their inter-personal skills of details methods procedures and modalities which will result into business transactions.

ABOUT SOCIAL MATURE DISCOURSE:

The social discourses between two people are not always clearly understood just as you have sounds coming through an instrument however it comes through intervals. This interval communicates influx ting aspects that can be interpreted and translated to keep alive the importance of its sound. That is sound socially mature discourse. For this a great deal time energy and effort placed on the exact nature of adequacy cooperating properly communication the effectiveness of coordinating our task. Which is reconciling our difference through mature social discourse? This is the result of social solidarity social coherency social credibility social continuity and social diversity. The meaningful possibilities of this can be realized when we target our social discourse in a transparent manner (going beyond race class gender and religion) unlocking the law of self image.
